CASE STUDIES OF PROVEN PERFORMANCE

Taxes Saved: \$162,731* Restaurant/Retail Strip Center

ENGAGEMENT OVERVIEW

Segregation Holding was engaged by the new owners of a recently constructed, 100% occupied, strip center to conduct a cost segregation study. The objective was to identify assets that could be moved to shorter recovery periods in order to accelerate depreciation and defer taxes.

PROPERTY OVERVIEW

This restaurant strip center was constructed and placed into service in July 2012. The cost segregation study examined the interior build-out and associated site improvements with a total depreciable cost basis of \$3.7 million. The strip center consists of 7,555 s.f. of retail restaurant space on 1.1 acres of land.

ENGINEERING PROCESS

Our engineers examined all design and construction documents, contractor payment applications, and other related data to determine the cost basis for every component in the building. Next, our engineer conducted an on-site inspection to identify and photograph all assets eligible for accelerated depreciation. Our team (onsite engineer, senior engineer, and tax specialist) reviewed the cost segregation study and certified its completeness and accuracy.

ESTIMATE OF BENEFITS AND SAVINGS

The pre-engagement benchmark estimate we provided to the new owners showed a potential reallocation of \$81,246 or 17% to shorter recovery periods. The projected tax benefit was over \$83,613 in first year savings with \$110,100 in current Net Present Value tax savings.

RESULTS

Our study resulted in a total of \$158,505 or 32.88% being rescheduled to 5- and 15- year property. As a result, the property owner will save \$162,731 in first year tax payments and realize over \$248,945 in 10-year Net Present Value tax savings.
